

JACOB ADAMS

SENIOR BACKEND ENGINEER 📍 KANSAS CITY, MO ☎ +1 (857) 342-3365

◦ DETAILS ◦

Kansas City, MO
+1 (857) 342-3365
Seidylgr95@gmail.com

◦ CORE SKILLS & TOOLS ◦

Java
C#
Python
TypeScript
Spring Boot
ASP.NET Core
FastAPI
Flask
Node.js
REST APIs
OpenAPI/Swagger
gRPC
Microservices
AWS (S3, Lambda, API Gateway, Redshift, Glue, Kinesis)
Docker
Kubernetes
GitHub Actions
Jenkins
Terraform
Linux
PostgreSQL
SQL Server
Redis
Elasticsearch
OpenSearch
Pinecone
Apache Spark
PySpark
Databricks
Delta Lake
Parquet

PROFESSIONAL SUMMARY

Senior Backend & Data Engineer with 5+ years of experience building scalable APIs, distributed systems, and cloud-based data platforms. Expert in Java, C#, Python, FastAPI, Spring Boot, SQL, AWS, Spark, and modern data engineering practices, with hands-on experience in microservices, ETL/ELT pipelines, search infrastructure, and AI-powered applications. Known for delivering reliable, high-performance backend solutions that improve data flow, system scalability, and platform efficiency.

EXPERIENCE

Backend Engineer at Constructor, Remote

May 2025 — May 2026

- Designed and built scalable backend services, REST APIs, and data processing workflows for an AI-powered e-commerce search platform using Java, C#, Python, FastAPI, and SQL.
- Developed microservices and ingestion services to process product catalogs, inventory, pricing, promotions, and customer interaction data from multiple internal and external systems.
- Integrated search infrastructure, vector retrieval systems, and ranking pipelines to improve product discovery, relevance, and personalized recommendations.
- Designed and optimized PostgreSQL and SQL Server data models to improve query performance, data access efficiency, and platform reliability for large-scale product datasets.
- Built high-throughput pipelines with Python, PySpark, AWS services, and Databricks to support indexing, analytics, and machine learning workflows.
- Automated deployments and data workflows using Docker, GitHub Actions, CI/CD pipelines, and cloud monitoring tools to improve release reliability.
- Collaborated with software engineers, ML engineers, data scientists, and product teams to deliver scalable AI-driven features and platform improvements.

Backend Engineer at IT Gurus of Atlanta

Sept 2022 — May 2025

- Designed and developed backend services, REST APIs, and scalable data processing applications using Python, FastAPI, SQL, Spark, and PySpark.
- Built ETL/ELT pipelines to ingest, transform, validate, and process structured and semi-structured data from databases, APIs, and cloud platforms.
- Developed secure APIs with authentication, request validation, asynchronous processing, and OpenAPI/Swagger documentation.
- Engineered AWS-based data solutions using S3, Glue, Lambda, Redshift, and API Gateway to support analytics, reporting, and operational workflows.
- Designed relational data models, optimized SQL queries, and improved database performance for large-scale applications.
- Automated deployments, data workflows, and quality checks using Docker, GitHub Actions, CI/CD pipelines, and monitoring solutions.
- Partnered with engineers, analysts, and business teams to deliver scalable backend applications and cloud data platforms.

EDUCATION

B.S. in Data Sciences, Penn State University

Aug 2018 — May 2022

★ CERTIFICATIONS

- **AWS Certified Developer - Associate, AWS**
May 2025 — May 2028
<https://www.credly.com/badges/c49d161e-2bcc-4b0c-9260-50319c230d9c>
- **Microsoft Certified: Azure Administrator Associate, Microsoft**
Oct 2025 — Oct 2026
<https://learn.microsoft.com/en-us/users/jacobadams-0925/credentials/c49a3be012fc30ef>
- **Databricks Accredited Databricks Fundamentals, Databricks**
Mar 2026
<https://credentials.databricks.com/0c1f0a41-3298-43d4-8c5c-7738aafbd84e#acc.Avmp9xED>
- **Software Engineer, HackerRank**
Jun 2026
<https://www.hackerrank.com/certificates/afd13b2baca8>
